

ESTIMATED TOTAL POPULATION LIVING WITHIN FLOOD-AFFECTED AREAS, MYANMAR

Flood Analysis with MODIS Terra & Aqua Data Recorded 5 May & 15 April 2008; and LandScan 2005

This map provides an estimate of those potentially-affected people living directly within flooded areas of southern Myanmar. Red areas shown in the map represent standing flood waters identified from MODIS satellite imagery acquired on 5 May 2008 at a spatial resolution of 250m. Population estimates have been aggregated by township using the LandScan 2005 database. This flood detection is a preliminary analysis & has not yet been validated in the field.

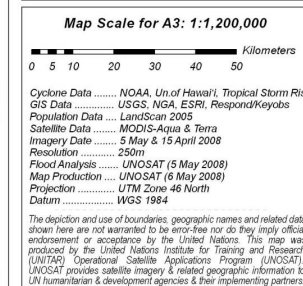

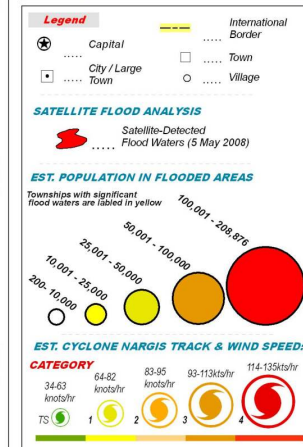

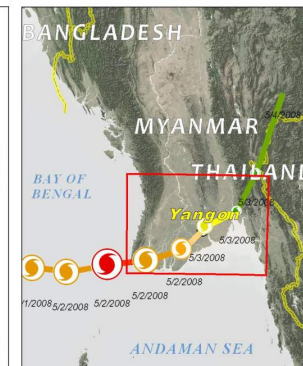

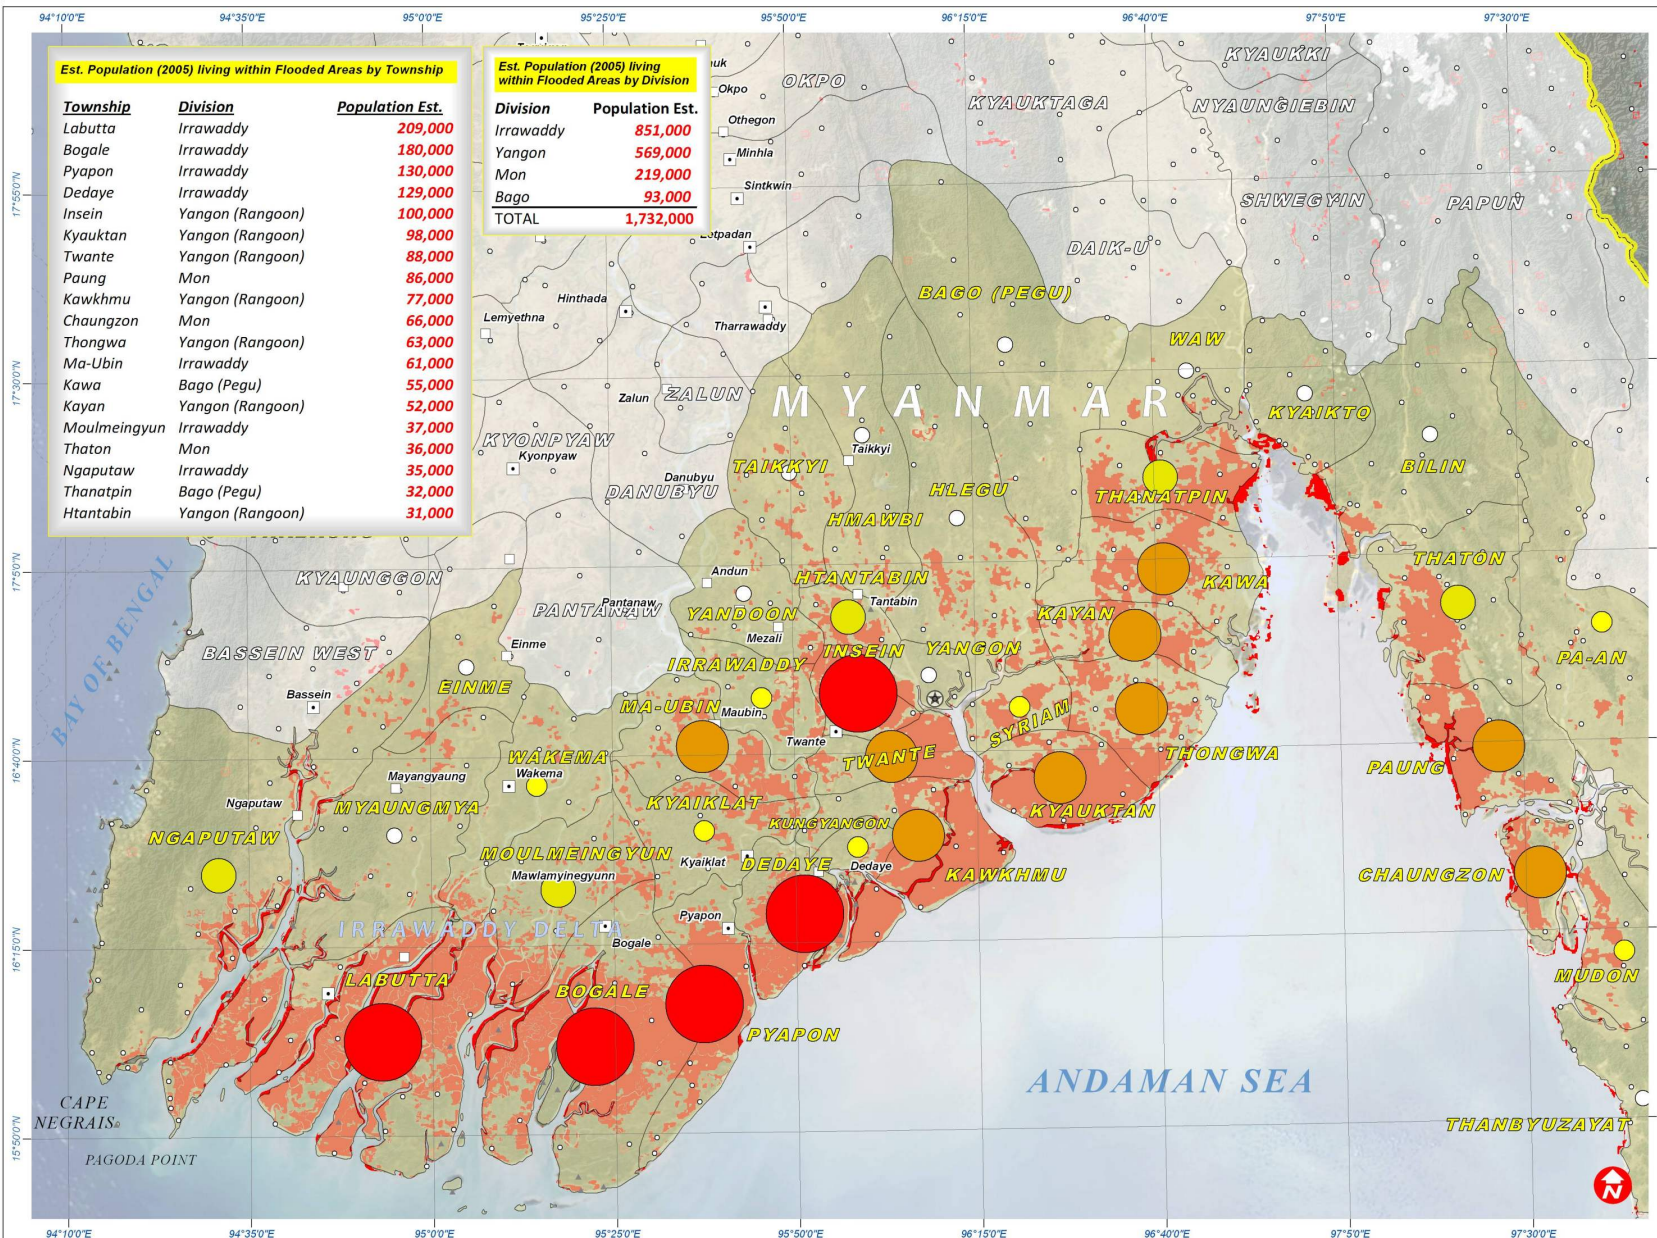

Cyclone Nargis

6 May 2008

Version 1.2
